eAuctionmate™

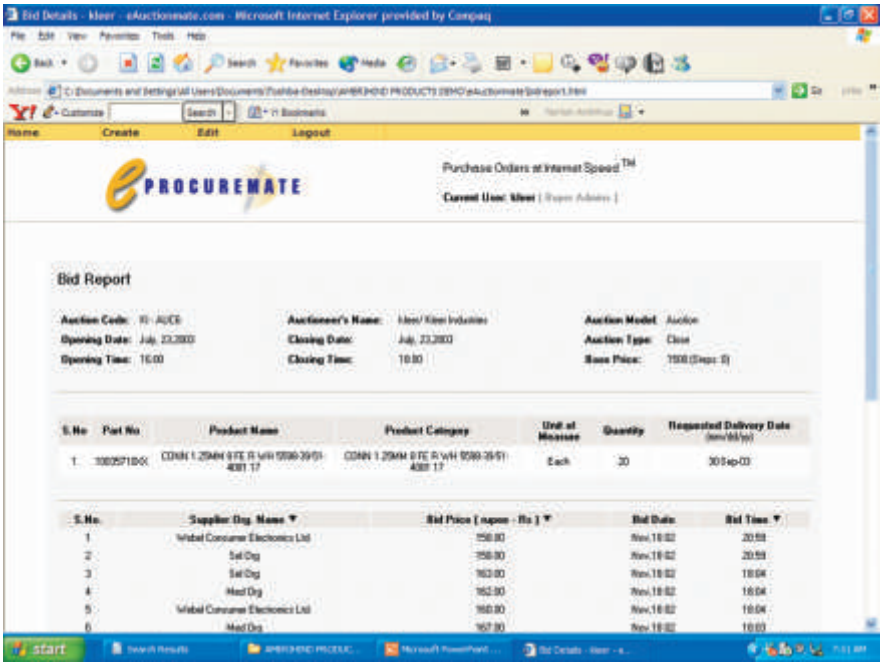

XTENZA

Web based collaborative Auction solution for corporate to derive maximum savings in procurement of direct, MRO materials & commodities

eAuctionmate is a web based reverse auction application for the buyer to get the lowest bid for items to be purchased from suppliers. A forward auction is where the seller gets the highest possible price for the item to be sold and the buyers outbid each other by bidding higher than the others. A reverse auction can be conceptualized as the exact opposite of a forward auction. In a reverse auction, the buyer gets the lowest possible price for the item to be purchased and the sellers outbid each other by bidding lesser than the others.

- Reverse and Forward auction solution
- Easy configuration of Open and Closed Auction
- Determination of base price through RFQ process
