eDecisionmate™

XTENZA

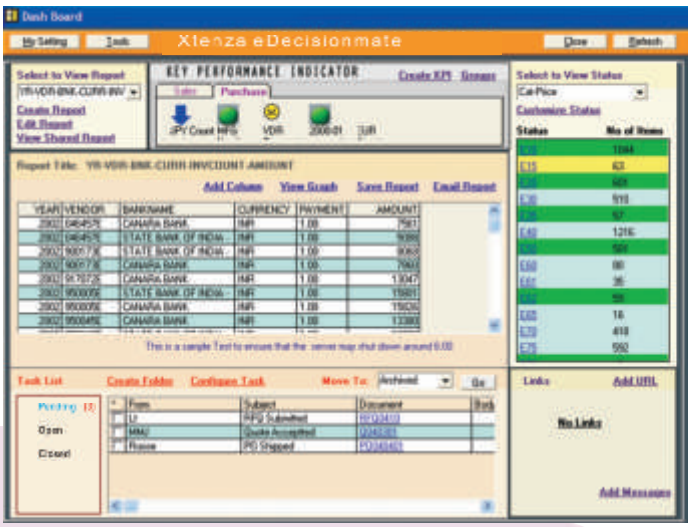

Business Intelligence (BI) application with customizable web based/ Intranet Reporting/Dashboard solution

eDecisionmate is a web based Business Intelligence application with customizable Reporting/ Dash board solution. eDecisionmate can be easily configured by the user to create custom reports from multiple database. Even users with limited IT knowledge can create custom reports. User can specify the server name or the IP address to pull data from tables in multiple disparate applications and database using intelligent connectors, which can be presented as an unified report in used-defined formats. The reports can be downloaded in ASCII or Excel formats with graphical reports for later use. The user can also customize the dash board with various Reports, Key Performance Indicators (KPI), Status of key business Indicators (such as Purchase Orders, Invoices, Shipping documents etc.), Links and tasks etc. for ready viewing and easy access of information.

- User-customizable reports and dash boards
- Connectors can pull data from disparate application or database to present an unified custom report
- Create custom dashboards in user-defined formats with Reports, KPIs and key business status
- Download reports and business documents in user defined ascii/ Excel formats with graphical reports
- Simple to use – Even non-IT users can create custom reports without bothering IT department
- Secured access using username and password
- Save as many reports in custom dash board
- Choose any field from any remote application/ database
- Define field as a field value, cumulative value or instances
- Data interface with existing ERP / legacy systems such as SAP, ORACLE etc. using intelligent connectors
